

CROWDING TUBS

Palco Crowding Tubs offer you a top quality, safe, and portable means of handling your livestock.

- Dimensions and construction suitable for any crowding or sorting conditions.
Height: 6'
Length: 16' or 20'
Radius width: 8' or 10'
Construction: 1 1/2" square tubing.
- Pull 12 drop pins and your tub knocks down into 4 pieces for easy transport in your stock trailer.
- Wheel Kit available for portability.
- The unit is reversible, so the holding pen entrance can be either left or right hand.

(A Palco cutting gate or holding frame is necessary to complete the system and is not included as part of the tub.)

The spring-loaded latch has 14 different locking points in a full sweep of the crowding gate.

**Meeting the
Standards of
Today's Cattleman**

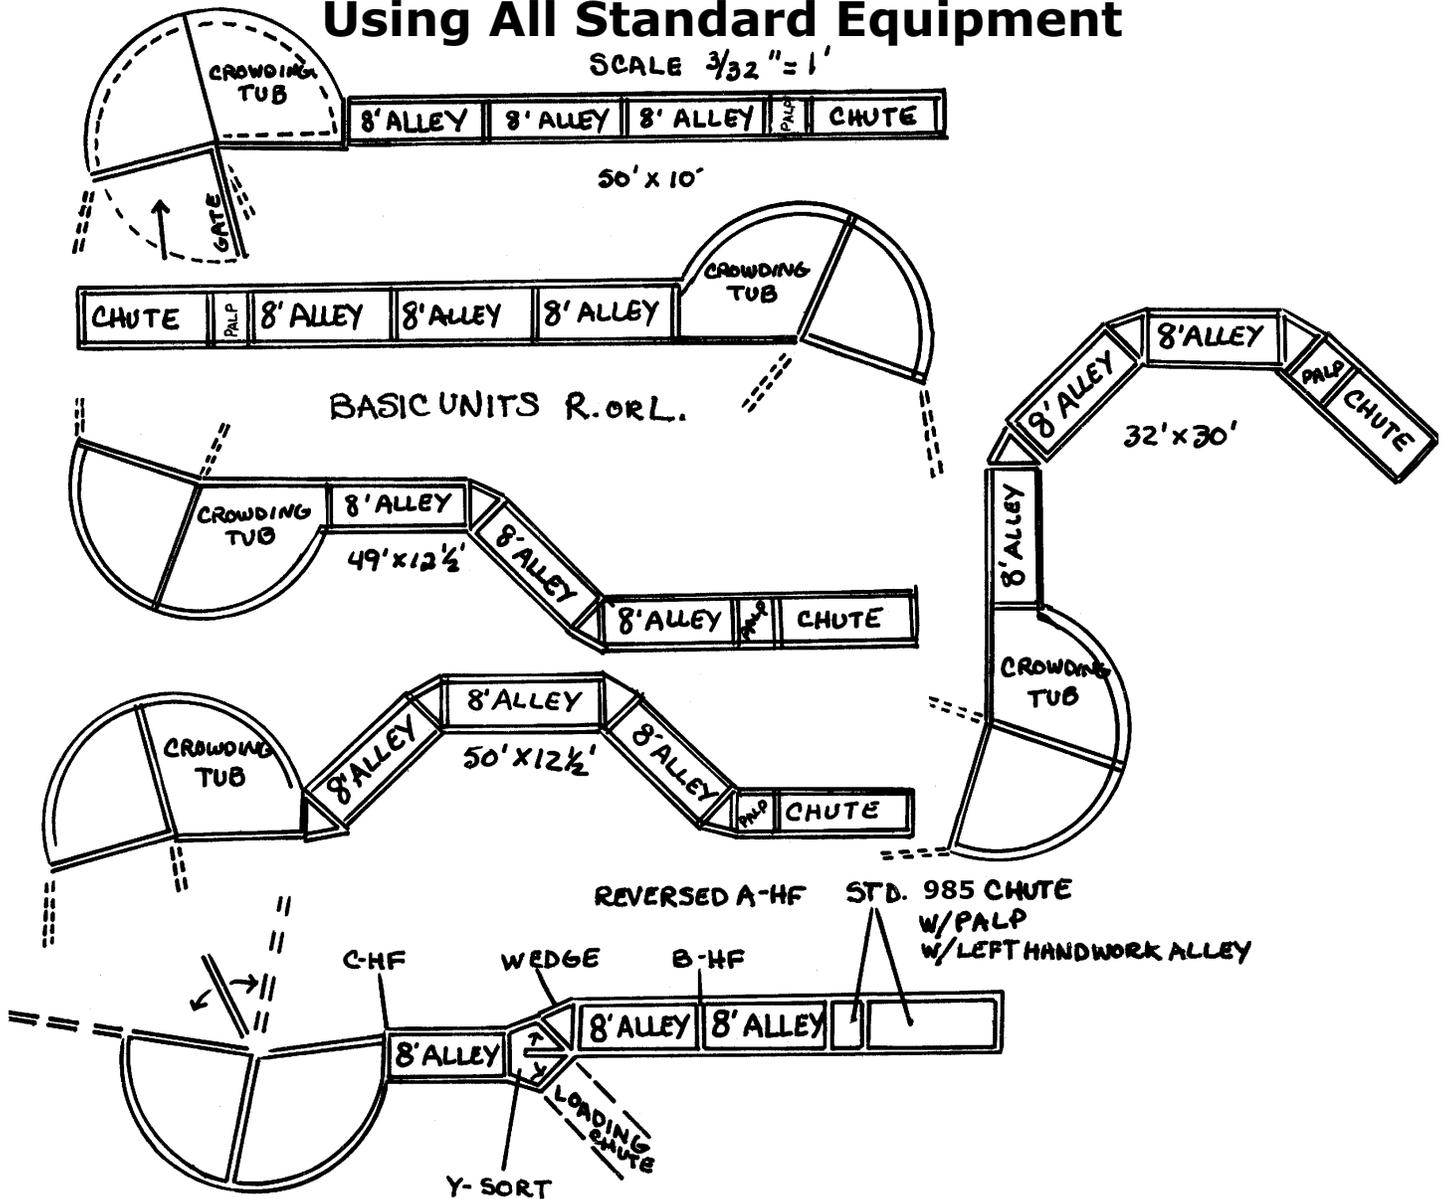

The tub may be hooked directly onto our crowding alley or working chutes.

Select Your Own

CATTLE HANDLING SET-UP

Using All Standard Equipment

SCALE $\frac{3}{32}'' = 1'$
